

## Trane Hong Kong Honored with Green Building Award 2019

*Mr. Frankie Chan, Managing Director of Trane Hong Kong (4th from R), together with his management team, receives the Green Building Award from Mr. Michael Wong, JP, Secretary for Development (4th from L) in Hong Kong.*

**Hong Kong, 6 Nov 2019** – Trane Hong Kong has been awarded with the Grand Award of the Building Products & Technologies Category in the **Green Building Award 2019 (GBA 2019)** for its flagship green innovation product: the new **Trane CenTraVac™ Chillers @R514A**. Frankie Chan, Managing Director of Trane Hong Kong has attended the award ceremony together with his management team and honorable guests yesterday to receive the award.

Since 2006, Green Building Award recognizes the building-related projects and organizations with outstanding performance and contributions in sustainability and encourages the adoption of sustainable planning, design, construction, management, operation, maintenance, renovation and decommissioning of buildings.

“I would like to thank the organizing committee and his Judge Panel for selecting **Trane CenTraVac™ Chillers @R514A** as the winner of the GBA 2019 for the Building Products & Technologies Category. This is truly an excellent recognition of Trane’s innovation and technology in advancing energy saving and carbon emission reduction,” said Frankie Chan.

Trane has always been committed to energy-saving, environmental-friendly air-conditioning products and solutions, and provides integrated planning, design and construction services for new and energy-saving retrofit projects. In the future, Trane will continue to devote itself to the research and development of energy saving products and technologies, constantly improve energy saving solutions, help customers further improve energy efficiency and emission reduction targets, meanwhile implementing our [\*\*2030 Sustainability Commitment\*\*](#).

### **About Our 2030 Sustainability Commitment**

On May 16, 2019, Ingersoll Rand, together with leading brands Trane® and Thermo King® announced its 2030 Sustainability Commitment aligned to the time horizon of the United Nations Sustainable Development goals. These commitments are designed to meet the challenge of climate change, provide world-class systems and service performance for buildings, homes, transportation and industrial customers, and improve the quality of life for the people and communities where it operates and serves. The company will continue momentum and create positive impact through three actions by 2030:

- Scale technology, innovation and sustainability strategies to enable more efficient customer solutions. This includes reducing the customer carbon footprint by one gigaton<sup>1</sup> CO<sub>2</sub>e – equivalent to the annual emissions of Italy, France and the United Kingdom combined.

- Transform its supply chain and operations to have a restorative impact on the environment including achieving carbon neutral operations, zero waste to landfill and a 10% absolute reduction in energy consumption, and giving back more water than we use in water-stressed areas.
- Increase opportunity for all, strengthening economic mobility and bolstering the quality of life of our people and those in the communities where we operate and serve. This includes achieving gender parity in leadership roles and a workforce reflective of our community populations, maintaining livable market-competitive wages and progressive benefits; and broadening community access to well-being services including food/nutrition, housing and shelter, transportation, education and climate comfort.

## About Green Building Award 2019

The Green Building Award is jointly organized by the Professional Green Building Council (PGBC) and the Hong Kong Green Building Council (HKGBC). Inaugurated by PGBC in 2006,

## Trane Hong Kong

A division of TYS Limited

Jointly owned by Jardines and Trane

12/F, Manhattan Centre, 8 Kwai Cheong Road  
Kwai Chung, New Territories  
Hong Kong

the Award aims to provide recognition to building-related projects and organization with outstanding performance and contributions in sustainability and the built environment and also to transform the mainstream market towards wider adoption of sustainable planning, design, construction, management, operation, maintenance, renovation and decommissioning of buildings.

With the theme of 'Inspiring the Next Generation • Excellence in Sustainable Built Environment', PGBC and HKGBC are co-organizing the GBA 2019 with an award presentation dinner held on 5th November this year.
